GENERAL WORKING CONDITIONS OF THE SHEET METAL TRADE/APPRENTICE

Sheet metal workers fabricate and install metal of varying thicknesses as well as nonmetallic, construction materials. They work from blueprints and sketches which set out the dimensions, locations, assembly procedures, and installation sequences that they must follow to detail, cut, form, fabricate and erect the materials used during construction. They have to understand the English language for the purpose of listening, reading, writing and other communication skills necessary in the workplace. They work with a variety of hand, mechanical and power cutting, punching, and forming machines, welding and burning equipment and lifting equipment such as hoists, chain falls, cranes, hi-lows, and helicopters. Work is performed indoors and outdoors and in all types of weather. It involves considerable standing, bending, kneeling, walking, reaching, and lifting, as well as work at heights, and the frequent unaided lifting of tools, materials, supplies and equipment weighing as much as 75 pounds. The work may be performed in easily accessible or cramped spaces located above, at or below ground level, in cold or extreme heat, and/or in clement or inclement weather.

Although hazards are kept to a minimum by following safety measures, the apprentice/journeyperson sheet metal worker is subjected to a variety of hazards such as cuts from sharp metal, burns from welding and cutting, falls from heights and strains from bending and lifting heavy objects. Sheet metal workers can be exposed to a variety of chemicals, paints, solvents, oils and fumes in the shop and on the construction site. They must be able to perform job assignments while wearing respirators, hearing, eye and head protection and/or a work harness (personal protection equipment), when required.

The work of the sheet metal worker may be seasonal in character and sometimes subject to prolonged layoffs. Sheet metal workers are required to provide their own dependable transportation to and from work and school and from one area job site to another throughout the six (6) county areas of Wayne, Oakland, Macomb, Washtenaw, St. Clair and Sanilac. Fabrication and erection schedules may require working on day, afternoon or night shifts.

This description of the duties and working conditions of the sheet metal worker is not completely encompassing. It is the responsibility of the sheet metal worker to perform whatever duties the employer assigns which are necessary to complete the fabrication and installation of sheet metal work in a safe and efficient manner.

I have read and understand all of the above stated working conditions. Yes No

I am physically willing and able to work under conditions described above. Yes No

If I am accepted into the Sheet Metal Workers' Local 80 Apprenticeship program I agree to submit to a drug/alcohol screening test at the Committee's expense. Yes No

If I am accepted into the Sheet Metal Workers' Local 80 Apprenticeship program I agree to comply with all rules and regulations as adopted by the Sheet Metal Workers' Local 80 Joint Apprenticeship Committee. Yes No

By signing below I acknowledge that all statements set forth on this application are true and complete, and that the Sheet Metal Workers' Local 80 Joint Apprenticeship Committee is relying on my statements in considering my application.
